Virus Genes

Volume 7 (1993)
Table of Contents

Number 1

Overall signal sequence hydrophobicity determines the in vivo translocation efficiency of a herpesvirus glycoprotein ..... *Patrick Ryan, Alan Robbins, Mary Whealy, and L.W. Enquist* 5

The neurotoxin-like sequence of human immunodeficiency virus GP120: A comparison of sequence data from patients with and without neurological symptoms ..... *Anders Sönnerborg and Bo Johansson* 23

Alterations in DNA sequence and RNA transcription of the *Bam* HI-H fragment accompany attenuation of oncogenic Marek's disease herpesvirus ..... *Norman Ross, Matthew M. Binns, Martin Sanderson, and Karel A. Schat* 33

Genomic rearrangements of retroviral vectors carrying two genes in F9 EC cells ..... *Beate Breuer, Barbara Steuer, and Angel Alonso* 53

Molecular cloning and complete nucleotide sequence of genomic RNA of the AIK-C strain of attenuated measles virus ..... *Takayuki Mori, Keiko Sasaki, Hiroshi Hashimoto, and Satoshi Makino* 67

Comparative sequence analysis of the M gene among rabies virus strains and its expression by recombinant vaccinia virus ..... *Kazufumi Hiramatsu, Kazuaki Mannen, Kumato Mifune, Akira Nishizono, and Yoshiko Takita-Sonoda* 83

Gene A32 product of vaccinia virus may be an ATPase involved in viral DNA packaging as indicated by sequence comparisons with other putative viral ATPases ..... *Eugene V. Koonin, Tatjana G. Senkevich, and Victor I. Chernos* 89

Sequence and gene structure of the hepatitis E virus isolated from Myanmar ..... *Thein Thein Aye, Toshikazu Uchida, Xuezhung Ma, Fusae Iida, Toshio Shikata, Munetaka Ichikawa, Tetsuji Rikihisa, and Khin Maung Win* 95

The genome of equine herpesvirus type 2 harbors an interleukin 10 (IL10)-like gene ..... *Hans-Jürgen Rode, Waltraud Janssen, Angela Rösen-Wolff, Joachim Jakob Bugert, Peter Thein, Yechiel Becker, and Gholamreza Darai* 111

Number 2

Molecular cloning and sequencing of coat protein-encoding cDNA of rice tungro spherical virus—A plant picornavirus ..... *S. Zhang, M.C. Jones, P. Barker, J.W. Davies, and R. Hull* 121

Effect of herpes simplex virus type-1 U_L41 gene on the stability of mRNA from the cellular genes: β-actin, fibronectin, glucose transporter-1, and docking protein, and on virus intraperitoneal pathogenicity to newborn mice ..... *Y. Becker, E. Tavor, Y. Asher, C. Berkowitz, and M. Moyal* 133

Nucleotide sequence of the envelope protein gene of the tick-borne flavivirus, Kumlinge A52 ..... *J.E. Whitby, A.D. Jennings, and A.D.T. Barrett* 145

Expression of the "helper component" protein of potato virus Y (PVY) in *E. coli:* Possible involvement of a third protease ..... *Y. Stram, A. Chetsrony, H. Karchi, M. Karchi, O. Edelbaum, E. Vardi, O. Livneh, and I. Sela* 151

Nucleotide sequence and in vitro translation of the coat protein gene of cymbidium mosaic virus ..... *K.-K. Neo, S.-M. Wong, and M. Wu* 157

In vitro characterization of a herpes simplex virus type 1 ICP22 deletion mutant ..... *K.L. Poffenberger, P.E. Raichlen, and R.C. Herman* 171

Transacting activities of the E7 genes of several types of human papillomavirus ..... *T. Ibaraki, M. Satake, N. Kurai, M. Ichijo, and Y. Ito* 187

Identification of novel singly spliced pX mRNA transcripts common to all human T-cell leukemia virus type 1-related retroviruses ..... *S. Orita, S. Sato, Y. Aono, N. Minoura, T. Yamashita, Y. Hinuma, and H. Igarashi* 197

Site-directed mutagenesis in the active site of the herpes simplex virus type 1 thymidine kinase gene ..... *J. Fetzer, G. Folkers, I. Müller, and G.M. Keil* 205

Number 3

Herpesvirus ICP18.5 and DNA-binding protein genes are conserved in equine herpesvirus-1 ..... *C.W. Bell and J.M. Whalley* 219

Subcloning of HIV-2 *nef* genes in *E. coli* and immunological reactivity of expressed fusion proteins ..... *R. Ulrich, H. Siakkou, J. Mayer, N. Kienzle, N. Müller-Lantzsch, and D.H. Krüger* 229

Analysis of 3′ terminals of human immunodeficiency virus type 1 transcripts in persistently infected cells ..... *T. Masuda, M.A. El-Farrash, M.J. Kuroda, and S. Harada* 241

Comparative sequence analysis of the coat proteins of biologically distinct citrus tristeza closterovirus isolates ..... *H. Pappu, S. Pappu, C. Niblett, R. Lee, and E. Civerolo* 255

Nucleotide sequence of the coat protein gene of citrus tristeza virus: Comparison of biologically diverse isolates collected in Israel ..... *M. Mawassi, R. Gafny, and M. Bar-Joseph* 265

PCR detection of amplified 132 bp repeats in Marek's disease virus type 1 (MDV-1) DNA can serve as an indicator for critical genomic rearrangement leading to the attenuation of virus virulence ... *Y. Becker, E. Tabor, Y. Asher, I. Davidson, M. Malkinson, and R.L. Witter* 277

Fowlpox virus encodes a protein related to human deoxycytidine kinase: Further evidence for independent acquisition of genes for enzymes of nucleotide metabolism by different viruses ..... *E.V. Koonin and T.G. Senkevich* 289

Use of λgt11 and monoclonal antibodies to map the gene for the 60,000 dalton glycoprotein of infectious laryngotracheitis virus ..... *K. Kongsuwan, M.A. Johnson, C.T. Prideaux, and M. Sheppard* 297

Number 4

Editorial ..... *Y. Becker* 309

Isolation and analysis of vaccinia virus previrions ..... *J.K. VanSlyke, P. Lee, E.M. Wilson, and D.E. Hruby* 311

Amplification and detection of a single molecule of human immunodeficiency virus RNA ..... *S. Nakamura, S. Katamine, T. Yamamoto, S.K.H. Foung, T. Kurata, Y. Hirabayashi, K. Shimada, S. Hino, and T. Miyamoto* 325

Comparative sequence analysis of four complete primary structures of plum pox virus strains ..... *L. Palkovics, J. Burgyán, and E. Balázs* 339

Expression of the collagen-like putative oncoprotein of *herpesvirus saimiri* in transformed T cells ..... *M.M. Medveczky, P. Geck, R. Vassallo, and P.G. Medveczky* 349

The 5′ untranslated region of PVY RNA, even located in an internal position, enables initiation of translation ..... *C. Levis and S. Astier-Manifacier* 367

Nucleotide sequence of a Singapore isolate of zucchini yellow mosaic virus coat protein gene revealed an altered DAG motif ..... *S.-C. Lee, M. Wu, and S.-M. Wong* 381
